The DMN-WESTINGHOUSE DL (Dust Lock) is of a dedicated design for filter applications. The universal flanges on both sides of the valve are drilled to PN 10 and suitable for both round and square counter flanges. The inlet of the valve is square, therefore accommodating both round and square outlets from the vessel that has to be discharged. The angle of the inlet down to the rotor has been kept as steep as possible, to reduce the chance of bridging. The outlet from the valve is round, so that you can discharge into either a round or square connection.

• Minimum air leakage
• Polyurethane rotor blades
• Suitable for both round and square counter flanges
• Ex stock delivery

**Product information**

The DL valve has a very large inlet and a direct drive, providing ample torque to drive the rotor, which has 6 replaceable and adjustable polyurethane blades. An optional steel fixed bladed rotor is also available.

The standard drive is a Nord helical geared motor, type SK01-F-71L/4, 0.37 kW, IP 55, isol. F, giving 27 rpm at 50 Hz and 32.4 rpm at 60 Hz. Suitable for 230/400V 50 Hz and 278/480V 60 Hz.

The standard model is suitable for handling products up to a temperature of 70 °C and a maximum pressure differential of 0.5 bar. The valve is pressure shock resistant up to 10 bar pressure.
DMN-WESTINGHOUSE have been designing and manufacturing rotary valves, diverter valves and other related components for the bulk solids handling industry for more than 30 years. Offering tailor made solutions for chemical, food, plastics and pharmaceutical industries, DMN-WESTINGHOUSE products are distributed world-wide.

Besides an extensive range of standard components, we supply USDA approved sanitary versions and explosion-proof models.

An extensive network of subsidiaries, distributors and representatives ensures a high level of service and support all over the world.
